Applying Thought

**iview** | smarter way to identify your visitor

Smart and Sleek Video Door Phone with 7 inch colour display and hands-free talking

smart | sleek | elegant

WIPRO  SECURITY

gone are the days....

when we used to welcome every visitor,  
and let in anyone and everyone who knocked our door

It is time we stop getting presumptuous about our visitors. Nowadays, it is all about being well informed right from the start. It is also about exercising a choice and having complete control on one's decision- whether or not to open the door. So why rely on a miniscule keyhole, or precariously bend over the window every time that door bell rings?

Wipro Home Security brings to you something smarter and elegant – i-View – a video door phone with a difference, giving you an opportunity to identify your visitor plus a complete freedom of choice.

## the **i-view** advantage

### sleek and stylish

- Sleek and elegant looks
- 7" Colour TFT display
- Two-way communication with clear voice output
- Stylish buttons for easy controls

### hands-free communication

- Single press button to turn on the out door bell camera from the handset
- Hands free talking for ease and comfort
- Remotely unlock the door just by a single press button

### easy to install

- A simple two part system comprising of a video door phone and camera
- Easy plug and play installation
- Less maintenance
